- **Fault protection panels for engines and pumps**
- **Swichgage® indication and automatic fault shutdown**
- **Compact and easy to install**

### Description

751602 and 751603 panels provide simple and reliable fault protection for engine-driven and pump applications.

The panels use the accurate and dependable Murphy Swichgage® for status indication and adjustable limit fault shutdown. Both panels feature Swichgages® for engine oil pressure (0 - 100 psi / 7 Bar) and coolant temperatures (50 - 120°C), plus a front facia emergency stop push-button. Model 751603 additionally has a 0 - 20 Bar water pressure Swichgage®, with user-adjustable shutdown limits for high and low pump pressure.

The 75160 series is designed for use with 12V engines with energised-to-run type fuel solenoids. Automatic fuel shutoff is by use of Murphy 518APH magnetic switch contacts. The switch is manually held in reset during engine/pump startup, but will release and latch following an engine fault.

75160 panels use a rugged black plastic, surface-mounted casing. Standard models are supplied complete with a 2 metre oil line and adaptors, 3 crimped wires for electrical connection (battery positive, negative and fuel/shutdown output) and a wiring diagram. A 2 metre water pressure utility line is additionally supplied with the 751603.

### Warranty

A two year limited warranty on materials and workmanship is given with this Murphy product. Full details are available on request and at [www.fwmurphy.co.uk/warranty](http://www.fwmurphy.co.uk/warranty).

### Dimensions

### How to order

Stock code	Model/description
B2647	751602 panel, 0 - 100psi, 50 - 120°C
B2643	751603 panel, as 751602 plus 0 - 20 bar pump pressure Swichgage®
